

Analyst
CCB International Holdings

WONG Jimenez Kwan Chun
Associate of Business Administration (General Management)
Graduated in 2015

Talking about his school days at the College, Jimenez broke into a broad smile. He studied in the Associate of Business Administration (General Management). Completing the programme in 2015, he proceeded to complete his bachelor's degree at the City University of Hong Kong, majoring in Information Management. At present, a degree holder, he is working as an Analyst in the Investment Banking Division of CCB International Holdings. "The Associate of Business Administration (General Management) programme has provided me a comprehensive education on various aspects of business operation such as human resource management, marketing, accounting, and finance. Apart from study, there were plenty of other learning opportunities for students at the College such as company visits, mentorship scheme and overseas study tour. These activities have widened my horizons and equipped me to become an all-rounded professional. I sincerely thank the College for giving me a good education and the opportunity for university progression. Had it not been for the College, I wouldn't have come to my present position in life so smoothly. I have really enjoyed studying here."
